linkedin.com/in/hardeep-singh-mehta-3828052a

FOUNDER & CTO · ZERO-TO-ONE PLATFORM BUILDER — GAMING · FINTECH · WEB3 · AI

EXECUTIVE SUMMARY

Builder-first technology executive with **15 years taking products from blank repository to eight-figure revenue** — as architect, infrastructure lead, and operator. Bootstrapped a **100+ app real-money gaming portfolio to 5M+ users** and **~US\$10M in annual gross revenue**, running it for nine years, personally designing the game architecture, payment rails, and the entire CI/CD and automation stack. Since 2021, built cross-chain trading infrastructure that has executed **250K+ on-chain transactions across 20+ EVM networks**, routed **US\$5B+ in partner volume**, and **raised US\$15M** for Rosato's fund-management business. An early convert to **agentic engineering** — orchestrating AI agents across coding, QA, and operations to get department-scale output from a lean team. Equally at home writing the first commit, hiring the team, and sitting across from investors.

CAREER HIGHLIGHTS

USD \$10M /yr PEAK GROSS REVENUE, BOOTSTRAPPED GAMING PLATFORM	USD \$15M RAISED FOR DEFI FUND-MANAGEMENT BUSINESS	USD \$5B+ PARTNER TRADING VOLUME ROUTED	250K+ ON-CHAIN TRANSACTIONS · 20+ EVM NETWORKS	3,000+ CAREERS LAUNCHED THROUGH TROOFAL	5M+ USERS ACROSS A 100+ APP GAMING PORTFOLIO

THE AI-NATIVE OPERATING MODEL

AGENTIC ENGINEERING From early vibe coding to disciplined agent orchestration — Claude Code-class agent fleets as the default build workflow: spec, delegate, review, ship. Team-quarters compressed into solo-weeks.	AUTONOMOUS QA & DOCS Runs AI agent harnesses that reverse-engineer sealed game clients, verify 100% payable coverage , and issue live-verified ship verdicts for Cavalox titles — a QA fleet that never sleeps.	100× LEVERAGE, LIVED DAILY LLM-automated operations across liveops, compliance documentation, and investor reporting — one builder with the output profile of a full department.

EXPERIENCE

ROSATO VENTURES rosato.vc · Dubai — remote 2024 – PRESENT

Partner — Algorithmic Trading, DeFi Infrastructure & Investor Relations · independent DeFi R&D since 2021

Venture & fund-management firm investing across Web3, AI, and fintech.

- Raised **US\$15M into the fund-management arm** and compounded investor capital through systematic, market-neutral algorithmic trading — scaling from self-funded arbitrage experiments (2021) to institutional-grade execution architecture in three years.
- Architected **cross-chain arbitrage infrastructure spanning 22 linked addresses across 20+ EVM networks** — 113K+ transactions on Base, 25K+ on Polygon, 24K+ on Optimism — engineered so no single venue, chain, or counterparty could become a point of failure.
- Built and operated a **1inch Fusion resolver footprint across 9 chains** (86K+ fills from the Base resolver alone) and **CoW Protocol solver deployments across 10 ecosystems** — auction-based fills, solver participation, multi-chain settlement — plus **gas-less stablecoin exchange primitives on Base** that strip native-gas friction out of routing.
- Routed **US\$5B+ in partner trading volume** through integrations with 1inch, CoW Swap, KyberSwap, OpenOcean, and Ox-style routing environments.

COMELY ENTERPRISES New Delhi, India DEC 2016 – PRESENT

Founder & CTO

Bootstrapped gaming & interactive-technology studio — a 100+ app real-money suite (Funnearn, Firedoom, Looper) and the Cavalox platform.

- Conceived, coded, and commanded a **real-money gaming universe — 100+ apps, 5M+ users — grown from an empty repository to ~US\$10M/year in gross revenue**; nine consecutive years of live, money-on-the-line operation until India's nationwide RMG ban (Aug 2025) closed the market for every operator in the country.
- Personally architected the full stack: **server-authoritative game engines**, one-minute head-to-head skill contests, matchmaking, real-money wallets with instant payouts, and fraud/risk controls battle-hardened against an adversarial user base — **Funnearn drew national press coverage and 117K+ active users** early in its run.
- Built the company's **entire CI/CD and automation backbone from bare metal to release button** — build pipelines, staged multi-platform releases across iOS, Android, and web for a 100+ app portfolio, telemetry, and liveops tooling — the discipline that let a lean team ship continuously for a decade.
- Hired, led, and mentored multidisciplinary teams spanning product engineering, game development, platform systems, and DevOps; drove early adoption of blockchain gaming, workflow automation, and AI-assisted engineering tooling.
- **Cavalox (2024 – present)**: conceived and shipped a **server-authoritative game-room platform now live in venues across Texas** — sealed client bundles, centrally managed engines and paytables, remote operator management — built by a deliberately tiny, AI-leveraged team, opening the US market a full year before the Indian ban hit. **Live beta on page 2.**

EXPERIENCE — CONTINUED

SHABODI shabodi.com · Ontario, Canada

2025 – PRESENT

Business Specialist — Independent Consultant

5G Application Enablement Platform — network-aware APIs for enterprise developers.

- Engaged in 2025 to support the company's next stage of growth — **connecting the team with new investors for the Series A extension round** it is raising.
- Advise the leadership team on **product improvements** to the platform — a company backed by CEAS Investments, SineWave Ventures, and Blumberg Capital through a **US\$10.3M (C\$13.9M) Series A**.

PROPTIGER.COM proptiger.com · Gurugram, India

JUL 2015 – DEC 2016

R&D Developer

One of India's leading online real-estate platforms.

- Built applied R&D prototypes that seeded new product capability: end-to-end audio/video merge tooling, 3D automation pipelines, chat systems, and AR/VR-oriented interactive experiences.

TROOFAL troofal.com · New Delhi → Ontario

2011 – PRESENT

Founder

Career-acceleration company for students and technology professionals.

- Founded and scaled a training-and-placement business that has **helped 3,000+ students and professionals land jobs**; evolved it into 1:1 interview and assessment coaching across MEAN/MERN, Java, Python, .NET, and data stacks, now serving North American candidates.
- Extended the mission through rural skilling initiatives (SkillUp, with Sadhbhav Trust).

SELECTED PRODUCTS & PLATFORMS

FUNNEARN real-money skill gaming · India

One-minute head-to-head skill battles with instant wallet payouts; 117K+ active users early in its run and national press coverage; flagship of a 100+ title real-money portfolio for nearly a decade.

FIREDOOM real-money arcade · iOS & Android

Casual arcade titles (Fruit Slice, Knife Hit, Crashy Racing) with real-cash stakes, low-friction ₹1 withdrawals, and shared wallet, matchmaking, and anti-fraud rails.

LOOPER & PORTFOLIO TITLES 100+ app suite · quick-session RMG

100+ fast-session real-money apps on one platform core — shared wallets, liveops, telemetry — new titles shipped in weeks, not quarters; **5M+ users across the suite**.

CAVALOX cavalox.com · game-room platform · Texas, US

Server-authoritative casino-style game-room platform powering venues across Texas. **Live beta: cavalox-test.web.app/game** — account **test-player** · password **test-player123**.

TECHNICAL & LEADERSHIP TOOLKIT

AI-NATIVE ENGINEERING	agentic engineering (Claude Code–orchestrated builds) · autonomous QA agent fleets · LLM orchestration & evals · prompt-to-production workflows · process automation
EXECUTIVE	0 → 1 product strategy · engineering org design & hiring · P&L ownership · capital raising & investor relations · regulatory navigation · go-to-market
PLATFORMS	server-authoritative game backends · real-money wallets & payment rails · matchmaking & liveops · fraud & risk systems · high-throughput event pipelines
INFRASTRUCTURE	CI/CD architecture from scratch · release automation · AWS · GCP · Firebase · observability & telemetry
WEB3 & TRADING	20+ EVM ecosystems · solver / resolver design (1inch Fusion, CoW Protocol) · cross-chain arbitrage · MEV-aware execution · market-making · smart-contract integration
CORE STACK	JavaScript / TypeScript · Node.js · Python · SQL & NoSQL · iOS / Android delivery

EDUCATION

B.Tech., Information Technology — University School of Information, Communication & Technology (USICT), GGSIPU, New Delhi

Showcase: Cavalox live beta — **cavalox-test.web.app/game** (account **test-player** · password **test-player123**); on-chain transaction footprints are publicly verifiable on major block explorers; press coverage and references available on request.
